- Served as a **Technical Mentor at Technovation**, guiding a team of 5 high school students in both technical and soft skills to prepare them for the international competition.

PROJECTS

Amazon Clone

- Built an Amazon Clone using React for the frontend, integrated Stripe for secure payment processing, and used Firebase for user authentication and real-time database.
- This project strengthened my skills in component-based UI development, state management, payment integration, and deploying full-stack web applications.

Netflix Clone

- Built an Amazon Clone using React for the frontend, integrated Stripe for secure payment processing, and used Firebase for user authentication and real-time database.
- This project strengthened my skills in component-based UI development, state management, payment integration, and deploying full-stack web applications.

House Rental System

- Collaboratively built a full-stack House Rental System using React.js and Node.js (Express). Gained skills in authentication, REST APIs, state management & role-based access.
- Solved real-world problems like booking conflicts, data validation & secure login as a team.

SKILLS

- **Advanced:** React, Python, Node.js, Microsoft Office, Google Work Space
- **Intermediate:** Flutter, Next.js, Machine Learning
- **Familiar:** Java, Zuster, AI

Certificates

- Advanced Web development | She Code 
- Introduction to Artificial Intelligence
